

April 18, 2016

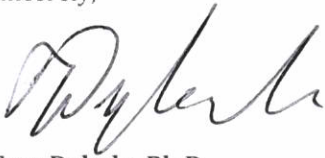

Dear Sir or Madam:

STATMET S.C., and Dr. Pawel Majdosz in particular, have been providing data analytics and analytical programming services to Exprentis, Inc., supporting our Resolvian product development efforts. The expertise and services provided by STATMET included definition of configurations and parameters of various statistical methods and procedures, and development of specialized R-System data analysis scripts that generated analytical results used to optimize analytical and alert generation models. The developed statistical methods and models were applied to fulfill compliance with Anti-Money Laundering regulations governing the financial services industry.

Dr. Majdosz provided very valuable services to Exprentis, sharing his experience and expertise in the area of general statistical methods and corresponding specialized functions of the R system. He has been a pleasure to work with, bringing his attention to detail to every problem faced. All of the work performed was done in a timely manner, and all solutions provided met or exceeded our requirements.

I can highly recommend STATMET, Dr. Pawel Majdosz, and their services for any statistical or data analysis needs.

Sincerely,

Tom Dybala, Ph.D.
Founder and President
Exprentis, Inc.
