

AGH UNIVERSITY OF SCIENCE
AND TECHNOLOGY

Faculty of Management

Kraków, 13.09.2016 r.

I met Dr Majdosz at the very beginning of his academic career. He was at the time young, energetic, and full of passion toward doing research, toward science. It was his passion that struck me the most. I knew that he would accomplish whatever goal he chose. Fortunately enough, he chose pursuing academic career under my supervision.

I worked with Dr Majdosz for over 8 years. I was the promoter of his doctoral dissertation and for two years he was in the Department of Applications of Mathematics in Economics that was directed by me. This gives me a unique position to assess the professional qualifications of Dr Majdosz.

He is a man of integrity, passionate about data science, and especially its applicability to solving real problems. He has deep knowledge of each method he have ever used and knows all the pitfalls associated with the application of quantitative methods in practice. His dedication to every task he got, his determination in overcoming difficulties, and his sense of humor make me sure that he deserves to be highly recommended as an outstanding professional to everyone who may be in need of statistical or econometric methods.

prof. dr hab. Henryk Gurgul
